

# Ahmad Mozaffar

## **Full Stack .NET Developer, MCT, Trainer, Technical Trainer & Author**

Beirut

[ahmad-mozaffar@outlook.com](mailto:ahmad-mozaffar@outlook.com)

+961 81-896-442

Since childhood all my time and efforts went into .NET, C#, WPF and other Microsoft technologies that helped empower multiple businesses from more than 4 years, currently working as a Full Stack .NET Developer leveraging the power of .NET Core and Microsoft Azure to reach beyond the limits in the cloud automation process.

MCT, MCSA, MCSA, Technical author and lifelong learner.

All my life constructed by self-education and empowered by Microsoft.

Willing to relocate: Anywhere

## Work Experience

---

### **Azure & .NET Consultant (Remotely, Part Time)**

ContraForce - Dallas, TX

October 2020 to Present

Responsible for developing, maintaining & architecting a security platform built on top of .NET 5 & Microsoft Azure. I structure the client-side app in addition to the server-side services, create and build a Blazer WebAssembly components & leverage the right Azure resources to construct an efficient solution within an agile environment alongside a set of security expertise & software engineers.

### **Software Engineering Content Creator**

YouTube - Beirut

December 2019 to Present

Share my passion about training people as a Microsoft Certified Trainer for Microsoft technologies from .NET Core, .NET 5, Microsoft Azure, Web & Business solutions development with the world through my YouTube channel "AK Academy"

### **Dot Net Full Stack Developer**

VIPTech S.A.R.L - Beirut

August 2019 to Present

Working on a freight management enterprise solution, help in developing new services, UIs and business logic, taking advantage of the Microsoft Azure cloud service to empower the platform, create IoTs & AI solutions to simplify the terminal operations, developing mobile enterprise applications to help workers on land be more productive. I use WPF, SQL Server, Xamarin.Forms, ASP.NET Core, .NET 5 and other Microsoft Technologies in my daily work

### **Freelance Software Developer**

Freelance - Damascus, SY

January 2016 to August 2019

As a freelancer, I was working on a project-based I have successfully managed to push businesses I have worked with towards the modern automation systems by using Microsoft technologies and Azure

and some of the achievements are a cloud solution for shipping enterprise, ERP for a cement factory engineering department, software to manage the telecommunication services shops, and some websites & developer tools.

I use C#, .NET Framework, .NET Core, Azure, SQL Server, Xamarin.Forms
